

CURABIS Project Management 365

Complete overview of
time registration and invoicing

CURABIS Project Management 365 is an add-on solution for the financial system Microsoft Dynamics 365 Business Central. A solution that connects project management with your financial system, automatically.

CURABIS Project Management 365 gives you an overview of both customer-related and internal projects where you need to manage time registration and possibly break it down into sub-tasks. The solution ensures that time registration is done easily and flexibly in Dynamics 365 Business Central.

An effective module for professional management of individual projects at all levels in the process, as well as security for correct invoicing!

Administrating project-related tasks made easy

If your daily business consists of selling hours and projects, you know how important it is to have an overview.

With CURABIS Project Management 365, you get a complete overview of all projects, which mainly consist of a main task and several sub-tasks.

Based on carefully selected factors, respective projects are created directly in 365 Business Central. A complete overview of correct data means that you can quickly make important decisions and is your guarantee that the customer will be invoiced correctly.

Key benefits of CURABIS Project Management 365:

- Easy to plan projects.
- Easy to register time.
- Easy to invoice.
- Easy to follow progress.
- Easy to get an overview.
- Ease of documenting and reporting.

The way to an easier everyday life and increased productivity

CURABIS Project Management 365 for Business Central is built to provide a quick overview in relation to planning your employees' working day, with insight into the workload on an individual level.

The solution gives both the project manager and the employee the necessary overview.

When you create a project, it is broken down into main tasks and subtasks. This means that several consultants can work on different tasks in the same project, and the project manager are always able to follow the progress.

When reporting, your customers obtain the same overview of the project.

Get satisfied employees and happy customers!

When managing projects based on valid data, you quickly and efficiently get a complete overview of ongoing tasks. At the same time, it is your guarantee that nothing falls between two chairs.

With CURABIS Project Management 365, you get a complete overview of hours sold and consumed. This means efficient projects, where the necessary consideration has been given to your employees and, not least, ensure that the customer is invoiced correctly for maximum earnings. Everything will appear on the invoice – easy and clear.

Complete time registration and correct invoicing! Easy right?

Who can use CURABIS Project Management 365?

All companies, regardless of industry, who need to manage projects with a complete overview of time registration and invoicing, will benefit from CURABIS Project Management 365. The tool can be purchased as an add-on for users of Dynamics 365 Business Central.
